Foundation Degree in Sport Fisheries and Aquaculture

Programme Specification

Primary Purpose
Course management, monitoring and quality assurance.

Secondary Purpose
Detailed information for students, staff and employers. Current students should refer to the related Course Handbook for further detail.

Disclaimer
The University of Portsmouth has checked the information given in this Programme Specification and believes it to be correct. We will endeavour to deliver the course in keeping with this Programme Specification but reserve the right to change the content, timetabling and administration of the course whilst maintaining equivalent academic standards and quality.

12. Educational Aims
The Mission Statement of the College is ‘To inspire learners to recognise and achieve their full potential’.

The aims of the Higher Education provision for the land-based industries are:
• To provide, in consultation with the land-based industries, course programmes which will meet current and anticipated education and training needs;
• To provide a systematic, coherent and balanced education through study within the course programmes on offer;
• To create an environment within which each student may fully realise his or her academic potential and within which the student's achievements are recognised;
• To develop, test and assess at appropriate level each student's intellectual capabilities;
• To equip each student with the necessary transferable skills and applied knowledge to enable them to make an immediate contribution in employment or to progress to further study;
• To provide course programmes that ensures equality of opportunity and encourages access and participation.

The General aims of the Programme:

• To provide a challenging and stimulating study environment.
• To provide a framework allowing students to follow a flexible coherent programme of study.
• To develop and assess a range of key skills by means of opportunities provided in the units of study.
• To provide a high level of work-based and work-related learning.
• To develop technical and work specific skills underpinned by academic learning.
• To equip graduates with the necessary transferable skills for lifelong learning, employability and flexibility in the context of changing labour markets.
• To provide students with the skills and knowledge required to maximise career opportunities.

The aims of the Foundation Degree in Sport Fisheries and Aquaculture:

The overall aim of this course is to provide education to Foundation Degree level for students who wish to pursue a career connected with aquaculture and sport fisheries, underpinned by a firm science foundation.

In pursuit of this aim the curriculum will encompass biological sciences, biochemistry, nutrition and anatomy and physiology as well as a full range of aquatic and environmental management techniques which will allow students to progress either into the world of work in aquaculture or sport fisheries or science related field or onto the final year of the BSc (Hons) in Aquaculture and Fishery Management.

Transferable/Employability skills are also included to prepare students for middle managerial positions in the various aquaculture or sport fisheries industries.

13. Reference Points
The programme and outcomes have been developed taking account of:

• UK Quality Code for Higher Education
• QAA Foundation Degree qualifications benchmark statement (2010)
• University of Portsmouth Code of Practice for Work-based and Placement Learning
• The University of Portsmouth Curriculum Framework document
• The scholarship and technical expertise of academic members of staff
• QAA Benchmark Statement for Biosciences (2007)
14. Learning Outcomes

Students will be able to demonstrate, at a threshold level, the:

Knowledge and Understanding of:

A1 Terminology, nomenclature and classification systems used in Aquaculture and Fishery Management (B)
A2 Scientific principles of sustainable production systems and environmental conservation
A3 Biological factors limiting production of aquatic systems and aquaculture systems; (A)
A4 Aquaculture production systems and how they can be improved (A)
A5 Methods of acquiring, interpreting and analysing information
A6 Practice and presentational methods relevant to Aquaculture and Fishery Management including data analysis and the use of statistics (B)
A7 Principles of habitat and aquatic ecology and conservation
A8 Changes and developments in Aquaculture and Recreational Fishery Management
A9 Economic theory and techniques (A)
A10 Regulatory and advisory bodies and their roles related to Aquaculture and Fishery Management (A)
A11 Experimental design and ethics

Learning and Teaching Strategies and Methods

The programme of learning will be managed through a combination of lectures, visits, industrial placements, practical lab work and fieldwork, visiting speakers and guided independent study including collaborative industry research. (A1-A11). A11 is incorporated into taught sessions on experimental design and through tutorials.

Assessment

Level 4 and 5 work is assessed primarily through a portfolio of evidence based on coursework including experimental reports, case studies, assignments, presentations and seminars. There will be examinations in one level 4 unit and half the level 5 units. A11 is primarily assessed through Applied Industrial Research.

B. Cognitive (Intellectual or Thinking) Skills:

B1 Recognise and apply subject specific theories, paradigms, concepts or principles (B)
B2 Apply subject knowledge and understanding to address familiar and unfamiliar problems. (A)
B3 Investigation or survey or other means to test a hypothesis or proposition. (A)
Learning and Teaching Strategies and Methods
The programme of learning will be managed through a combination of lectures, visits, industrial placements, practical fieldwork, visiting speakers and guided independent study.

Assessment
Level 4 and 5 work is assessed primarily through a portfolio of evidence based on coursework including laboratory investigations, reports, assignments, presentations and seminars. There will be examinations in one level 4 unit and half the level 5 units.

C. Practical (Professional or Subject) Skills:
C1 Plan, conduct and report on an investigation which may involve primary and secondary data (A)
C2 Obtain, record, collate and analyse data using appropriate techniques in the field and/or laboratory, working independently or in a group (B)
C3 Undertake field and laboratory investigations in a responsible and safe manner, paying due attention to risk assessment, rights of access, relevant health and safety regulations and legal requirements
C4 Appreciate financial and other management information and use it in decision making (A)

Learning and Teaching Strategies and Methods
Subject specific practical skills are developed through a portfolio of evidence based on coursework including laboratory investigations, reports, assignments, presentations and seminars (C1-C4).

Assessment
Practical skills at Levels 4 and 5 are assessed primarily through coursework including assignments, laboratory reports, presentations and seminars (C1-C4).

D. Transferable (Graduate and Employability) Skills:
D1 Appreciate issues of sample selection, accuracy, precision and uncertainty during collection, recording and analysis of data in the field and laboratory and the difficulties of incomplete information. (A)
D2 Receive and respond to a variety of sources of information: textual, numerical, verbal and graphical. (B)
D3 Prepare, process, interpret and present data and solve problems using appropriate qualitative and quantitative, computer based and non-computer based techniques and packages. (A)
D4 Cite and reference work in an appropriate manner. (B)
D5 Use the internet and other electronic sources critically as a means of communication and a sources of information. (B)
D6 Identify individual and collective goals and responsibilities and performing in a manner appropriate to these goals. (B)
D7 Evaluate performance as an individual and a team member. (A)
D8 Take responsibility for personal and professional learning and development. (A)
D9 Develop an appreciation of the interdisciplinary nature of science and the validity of different points of view. (B)
Learning and Teaching Strategies and Methods

Transferable and key skills are developed through computer based and non-computer based workshops, field and laboratory practicals, group work, independent guided learning and individual tutorial support. At Level 5 students analyse data collected for projects.

Assessment

Assessment of transferable and key skills is evidenced through coursework, presentations and group, laboratory and field investigations, as well as the level 5 project.

15. Course Structure, Progression and Award Requirements

Standard University rules apply. The regulations must be consulted for a full description of exit awards.

FdSc Sport Fisheries and Aquaculture is offered as a 2 year full time course or as a 3 year part-time route. (Note: the part time route has been suspended for 2013/14 because of low recruitment.)

Total unit value: 240 credits

There are two exit awards:
- Certificate of Higher Education requiring 120 credits
- FdSc requiring 240 credits

Mode of study: Full (2 years) and Part (3 years) Time.

One credit is equivalent to 10 hours of learning. Each level comprises of a minimum of 120 credits for a course total of 240 credits. Units are offered as 10, 20 or 30 credits.

Students will follow a set programme of study at Levels 4 and 5.

Initial assessment during induction includes an array of tests including an on-entry skills assessment and learning styles test (for example, VARK). The results of these are used to produce a profile of each student for the personal tutor, and a group profile for the course team. Where appropriate, students are referred to the Learning Support Centre for diagnostic testing and support. Each student and tutor set aims and objectives as part of an individual Personal Development Plan (PDP), which is developed and monitored through the individual tutorial system during the course and a portfolio developed through Work Practice units. Study skills, employability skills and career management skills are developed throughout the curricula, especially through the Work Practice units and the Applied Industrial Research project and through individual and group tutorials. Sparsholt College operates a ‘flying start’ programme for students to insure developmental formative assessment, with feedback, occurs within the first two weeks of the academic year. The college recognises formative assessment as an integral and required element of the learning process. Penalties for non-completion of formative assessment may range from grade penalties on summative assessments to withdrawal of services. See Sparsholt Policy on Higher Education Student Performance and Conduct.

Links with employers occur through the work placements and through a range of structured industrial visits. Specialist guest lecturers also provide students with insight into areas of work and employability. The department staff regularly meets with employers to discuss the usefulness and validity of the provision.
Careers guidance is formally included as a regular timetabled event and through group and individual tutorial support throughout levels 4 and 5. Guest speakers also provide useful careers guidance.

**Progression and transfer arrangements for FdSc students for entry to Level 6 of the BSc (Honours) Aquaculture and Fishery Management course.**

Students who have previously completed the Foundation degree in Sport Fisheries and Aquaculture at Sparsholt College, or a foundation degree or an HND in a similar discipline through another institution will be considered for direct entry to Level 6 of the BSc (Hons) Aquaculture and Fishery Management, subject to the following conditions.

a) For an FdSc Sport Fisheries and Aquaculture degree undertaken at Sparsholt College: achievement of 240 credits.

b) For an FdSc or HND obtained in an Aquaculture or Fisheries Management discipline through another institution, each application will be considered on an individual basis as a claim for advanced standing. The following criteria will form the basis for considerations:

- The Programme Management Team must be satisfied that the learning outcomes are broadly similar to Levels 4 and 5 of the degree programme. This is to ensure that the student has sufficient background in the subject discipline to be able to benefit from and succeed on the Level 6 programme.

- HND: Two-thirds of the HND modules studied at Level 5 are obtained at Merit Level or above. This must include the Thesis / Project module. A Data Analysis unit must be completed and achieved at Merit Level or above, either by distance learning prior to commencement of Level 6, or at the discretion of the area Learning Manager, during the first part of the Level 6 programme.

**Discretion**

In all cases the Programme Management Team, in consultation with the Higher Education Development and Quality Manager shall have discretion to depart from the criteria. Additional evidence provided by the student through interview which supports direct entry to Level 6 will be considered. If the Programme Tutor and Higher Education Manager are not satisfied that direct entry to Level 6 is appropriate, direct entry to Level 5 may be offered.

**16. Employability Statement**

Sparsholt College benefits from a high profile locally, regionally and nationally in the land based industries.

The college maintains close links with lead industry bodies, including numerous fisheries and aquacultural facilities as well as local and national wildlife trusts, sea fisheries committees and the Environment agency, which ensures the course incorporates the skills and understanding required by employers. A key strength of the provision at Sparsholt College is the link to employers in developing higher level vocational curriculum. Whilst at Sparsholt College the students will benefit from insights into a variety of aquaculture and sport fishery industries through visits, guest speakers and their work placements. Employability skills will be developed across the curriculum and specifically through the work placement units.

The work placement units will help develop student’s personal development portfolios and career management skills. This may, for example, be through seminars and tutorials to develop career decision making strategies and strategies for self-presentation at application stages and at interview. Employability skills linked to communication, numeracy and information technology will be embedded across the curriculum through the identification of key skills opportunities.
The students are likely to be gaining employability skills through work-place learning opportunities and all students will directly benefit from the on-site physical resources at the College. On-site facilities provide real work environments that students can begin to develop their applied knowledge and understanding of the fisheries industry.

Specialist units will make use of realistic simulations and case studies associated with the real-work environments provided by the facilities at the College. Students will be aware of the importance of voluntary work and extra curricula activities to develop the skills needed by employers and the industry. Employers will be involved in specialist units as guest speakers and where possible, visits will relate directly to the employers/ the industry.

17. Support for Student Learning

- The Course is managed by a Course Tutor
- Collaborative programmes are managed on a day-to-day basis by the Partner Contact who may or may not be the Course Tutor
- Induction programme introduces the student to the University of Portsmouth, Sparsholt College and their course
- Each student has a personal tutor, responsible for pastoral support and guidance
- College support services include careers, financial advice, housing, counselling etc.
- Learning Support and Disability Advisors provide DSA assessments and required learning support.
- Excellent library facilities at both U of Portsmouth and Sparsholt College
- A well-equipped teaching block, the Sainsbury Building, with a lecture theatre, laboratories and other teaching facilities is available.
- Student course and unit handbooks provide information about the course structure and University/College regulations etc.
- Feedback is provided for all assessments, both summative and formative
- Personal Development Planning (PDP) for all awards
- Group and individual briefings are given prior to all placements with employers and students receiving handbooks to support the learning whilst on placement

18. Admissions Criteria

A. Academic Admissions Criteria

Entry requirements are:

- Academic judgement that the student will benefit from the programme and successfully complete the course
- This may be evidenced by:

<table>
<thead>
<tr>
<th>Course</th>
<th>A Level</th>
<th>BTEC Extended Diploma</th>
<th>City &amp; Guilds Ext. Diploma</th>
<th>BTEC Diploma</th>
<th>City &amp; Guilds Diploma</th>
<th>Access to HE</th>

<td>MM</td>
<td>M</td>
<td>A satisfactory pass in a relevant Access course with 45 credits at level 3</td>
<td>Appropriate IB Certificates considered</td>
</tr>
</tbody>
</table>

- Pre-college experience in an appropriate work area or as a volunteer strongly recommended.
• We welcome applications from mature students (over 21 years) with experience or interest in all aspects of land based industries and we consider each application on an individual basis. If appropriate, prior learning may be assessed and accredited through the University of Portsmouth Accreditation of Prior Experience and Learning (AP(E)L) process.
• Applicants wishing to start the course in the autumn after leaving school are expected to have completed 14 years of schooling and normally be aged 18 or over. International students will normally be expected to demonstrate an IELTS score of 6.0 in proficiency in English language.

B. Disability
The University makes no distinction in its admissions policy with regard to disability and will endeavour to make all reasonable adjustments in order to make it possible for students to study at Sparsholt College on a course of their choice.

19. Evaluation and Enhancement of Standards and Quality in Learning and Teaching

A. Mechanisms for Review and Evaluation
• Course Tutor’s Annual Standards and Quality Evaluative Review (ASQER)
• University Academic Contact’s Annual Standards and Quality Report
• Annual Standards and Quality Evaluative Review for Collaborative Programmes including consideration of Subject and Award External Examiner Reports
• Unit and Course Level student feedback considered at Unit Assessment Boards, Boards of Study and Exam Boards
• Unit Assessment Board (UAB) consideration of student performance for each unit
• Periodic Collaborative Programme Review
• Periodic Collaborative Partner Review
• Student Representatives/ Learner Voice/ HE Student Council
• Staff Appraisals and Performance and Development Review
• Peer Review including Teaching and Learning observations
• Ethics and Research Standards Group’s Annual Report

B. Responsibilities for Monitoring and Evaluation
• Unit tutors for unit content and delivery
• Course Tutor for day-to-day running of course
• Partner Institution Academic Contact
• University Contact
• Board of Studies
• Head of Faculty
• Associate Dean (Academic)
• Associate Dean (Students)
• Unit Assessment Boards, Award and Progression Board of Examiners
• Ethics and Research Standards Group for ethical review and project approval
C. Mechanisms for Gaining Student Feedback

- Student Representation on Governing Board
- Boards of Study
- Unit, Course and College level student feedback questionnaires
- University participates in external student surveys, e.g., National Student Survey (NSS), Destination of Leavers from Higher Education (DHLE) Survey
- Cross College Learner Voice and HE Student Council

D. Staff Development Priorities

- Academic staff undertake activities related to research, scholarship, teaching and learning and student support, guidance and professional certification
- Annual Teaching observations inform CPD requirements
- Annual staff appraisal reviews match development to needs
- Managers undertake a variety of management development programmes
- New academic staff required to undertake PTTLS, or equivalent, initially (Staff teaching in both FE and HE are required to undertake PGCE-PCET equivalent)
- All academic staff are required to seek Higher Education Academy Fellowship and/or participate in the University of Portsmouth APEX programme
- Academic staff new to teaching required to undertake New Teaching Staff Induction
- Support Staff are encouraged to attend short courses in areas such as specific IT packages

20. Assessment Strategy

Level 4

Assessment will be both formative and summative throughout the programme. Formative assessment will enable the students to practice skills before the final summative assessment, e.g., in the Introductory Science unit the best mark out of three lab report write ups is used for the summative assessment grade. The assessment approaches for the core units include all the different assessment types the student is likely to encounter at the higher levels (bar the research project), but at a learning level that befits a first-year student. The assessments have been selected so as to enable students to practice research and referencing, writing essays and reports, preparing short presentations and learning to collect information for lab reports and portfolios, as well as building confidence in their ability to learn. The in-class tests and limited number of exams will provide an opportunity for the students to demonstrate their knowledge base, as well as prepare those students to move on to a full BSc Honours degree. Formative assessment will also enable students to demonstrate practical industrial skills, e.g., during the unit duties in the Industry Skills unit and during the fry rearing in the Salmonid Farming unit. Core units at this level do not allow students great scope to choose their assessment topics, or to provide evidence of critical thinking or in-depth analysis as we believe that these areas test higher cognitive skills that are best suited to level 5 and particularly 6.

Level 5

The assessment approaches for level 5 units expand on those for level 4, enabling the students to exercise more choices in assessment topics. Formative assessment will be used to test skills
development and the application of knowledge. For example, in the Financial Studies unit the students undertake a variety of formative case studies and in the Aquaculture and Fishery Science unit formative, in class tests are undertaken on pathogen identification and management and treatment calculations. Students will be expected to use a wide range of published source material and will be expected to correctly acknowledge all the sources. Increased use of essays and portfolios will demonstrate their ability to work independently, and a limited number of exams will continue to prepare them for level 6, should the student wish to continue.

21. Assessment Regulations

Rules apply as stated in the Collaborative Examination and Assessment Regulations for Sparsholt College.

22. Role of Externals

Subject External Examiners who will:
- oversee unit assessment and usually attend Unit Assessment Boards (UAB);
- review unit assessment strategy;
- sample assessment artefacts;
- present report to UABs.

Award External Examiners (usually also a Subject External Examiner) who will:
- oversee and attend Award/Progression (Examination) Boards;
- scrutinise and endorse the outcomes of assessment;
- ensure that the standard of the award is maintained at a level comparable with that of similar awards elsewhere in the United Kingdom.

23. Indicators of Standards and Quality

A. Professional Accreditation/Recognition

N/A

B. Periodic Programme Review (or equivalent)

The outcomes from the periodic Review in January 2014 confirmed fitness of purpose of curriculum, it also found the annual monitoring and review processes effective The key strengths of provision were as follows:
- The college is clearly responsive to feedback received from the external examiners, students and the University.
- Clear evidence of critical and evaluative reviews of the provision to enhance the student experience. Wide breadth of curriculum to reflect the complex and diverse sector areas.
- Having practitioners on the teaching team is clearly advantageous to students.
- Extensive, effective and proactive student engagement in enhancing quality.

C. Quality Assurance Agency

The College underwent QAA Higher Education Review in March 2014.

The report confirms that:
- The maintenance of the threshold academic standards of the awards offered on behalf of the degree-awarding bodies meets UK expectations.
• The quality of student learning opportunities **meets UK expectations**
• The quality of the provider’s information about learning opportunities **meets UK expectations**
• The enhancement of student learning opportunities **meets UK expectations**

The full report is available at [QAA report – Sparsholt College](https://www.port.ac.uk)
